

As a paying customer of XM Satellite Radio I do not think it should be up to the government to regulate what I can hear as long as it does not pose a threat to anyone. By threat I do not mean the threat of competition to NAB. Although at this point I am not receiving weather and traffic for my area I do hope that I will in the future and think it is definitely a benefit to many people.

Please reject the NAB petition 04-160.

Thank you for you attention

Don Patterson
